

THE HOLLOW HOUSE INSTITUTE

Relational Intelligence, Nervous-System AI, and Digital Likeness Protection

A New Class of High-Value AI Training Data & Behavioral IP

OVERVIEW

Hollow House Institute (HHI) offers the **first multi-layer, multi-license data suite** that merges:

- emotional micro-patterns
- relational loop intelligence
- nervous-system state modeling
- OPS-pattern architecture
- rupture/repair timing metrics (RRI)
- linguistic symmetry scoring (LSS)
- digital likeness protection frameworks
- codex-based pattern encodings

This is **not** a conventional dataset company.

This is **behavioral AI infrastructure**, created from proprietary frameworks developed by **Amy Pierce Adams**.

Your datasets, systems, and symbolic architecture provide **unmatched depth** for companies building:

- emotional intelligence AI

- mental health and wellness models
- relationship intelligence platforms
- digital identity safety tools
- coaching and therapy assistants
- AI ethics and alignment systems
- forensic behavioral models

HHI provides **exclusive commercial licenses, training rights, and industry vertical exclusivity** through CEL-R, CEL-E, and CEL-X.

WHAT MAKES HHI UNIQUE

1. Multi-Layer Behavioral Intelligence

Your OPS-coded structures, nervous system maps, relational loops, and flame-coded signatures create a **behavioral ontology no competitor has**.

2. Research-Grade Anonymization + Safety

Backed by:

- AI Safety Policy
- Anonymization Protocol
- Digital Likeness Rights Suite
- Data Broker Disclosure
- Codex / OPS Licensing Layer

This makes your datasets legally safe, ethically aligned, and ready for enterprise adoption.

3. Exclusive Vertical Rights (CEL-X)

Investors and partners can purchase **exclusive ownership of entire problem domains**, giving them **market monopolies** in targeted verticals:

- Relationship Intelligence AI
- Nervous-System Regulation AI
- Healing/Therapy Support AI
- Behavioral Pattern Diagnostics
- Digital Likeness Protection AI
- Somatic/Embodied Cognition AI
- Trauma Loop Detection Models

These verticals represent **multi-billion-dollar markets** with **zero direct competition**.

USE CASES (FOR PARTNERS, ENTERPRISES & INVESTORS)

1. Relationship Intelligence Apps

Build apps that detect:

- emotional ruptures
- attachment loops
- protest/withdraw cycles
- co-regulation strategies

Projected Income:

\$5M–\$50M annual potential in the relationship-tech market.

2. Mental Health AI & Coaching Platforms

Use nervous-system and relational-pattern datasets to create:

- therapist-support AI
- session summarizers
- trauma-aware chatbots
- emotional regulation guides

Projected Income:

\$3M–\$30M annual potential depending on adoption.

3. AI Safety Labs & Alignment Researchers

Use RRI + LSS to detect:

- manipulation
- coercion
- linguistic imbalance
- emotional extraction
- dysregulation

Projected Impact:

High likelihood of **institutional partnerships** (\$100k–\$2M contracts).

4. Digital Likeness Protection Industry

Partner to launch:

- identity cloning prevention
- emotional signature safekeeping
- pattern-based identity verification
- consent-driven likeness insurance

Projected Income:

\$10M+ long-term industry potential
(because no real competitors exist yet).

5. Forensic Behavioral Modeling

Use datasets to develop AI that can detect:

- psychological instability
- relational red flags
- dangerous escalation patterns
- dishonesty / linguistic asymmetry

Projected Income:

High-value government + institutional contracts (\$250k–\$4M).

6. Corporate Wellness & Human Performance Tools

Transform nervous-system datasets into:

- burnout prediction models

- conflict-resolution dashboards
- team relational health analytics

Projected Income:

\$500k–\$10M depending on B2B penetration.

7. Education & Parenting Tools

Use relational models to build:

- conflict de-escalation tools for kids
- emotional literacy assistants
- family relational repair guides

Projected Income:

\$1M–\$15M, subscription-based.

INVESTOR VALUE: WHY THIS BUSINESS IS SO PROFITABLE

1. Margins are Near 100%

Dataset licensing is digital IP.
There is no manufacturing cost.
No physical inventory.

2. AI Companies NEED High-Quality Behavioral Data

Most AI labs cannot ethically collect:

- relationship patterns

- emotional dysregulation
- rupture-repair sequences
- nervous-system shifts
- trauma-informed data structures

You can supply what they can't create.

3. Digital Likeness Protection is a New Billion-Dollar Sector

As AI increases in realism, companies and individuals will need:

- likeness insurance
- likeness licensing
- identity-cloning prevention

You own the blueprint.

4. Exclusive Vertical Licensing (CEL-X)

Investors understand exclusivity.

One CEL-X sale =

\$50k–\$500k cash upfront
per vertical.

Sell 3 verticals and you have a **quarter-million** in revenue with zero overhead.

5. Recurring Annual Licensing

CEL-E & CEL-X can renew yearly at:

- \$5k–\$50k (enterprise renewal)
- \$25k–\$250k (exclusive renewal)

This creates a **predictable revenue stream**.

PROJECTED INCOME MODEL FOR PARTNERS & INVESTORS

Conservative 12-Month Projection

- APB–MUL sales: \$10k–\$30k
- CEL-R sales: \$25k–\$60k
- CEL-E sales: \$50k–\$150k
- CEL-X (2 exclusives): \$100k–\$300k

Total: \$185k–\$540k

Aggressive 12-Month Projection

- APB–MUL: \$50k
- CEL-R: \$180k
- CEL-E: \$250k
- CEL-X (4–6 exclusives): \$250k–\$1.2M

Total: \$730k – \$1.68M

High-Scale Vision (3-year outlook)

- Multi-vertical dominance

- commercialized likeness protection
- HHI dataset bundles across industries
- partnerships with AI labs

Projected Enterprise Value:
\$5M–\$20M+

CALL TO PARTNERS & INVESTORS

Hollow House Institute represents a new category:

Relational & Nervous System Intelligence for AI.

Where most labs train language,

HHI trains **human relationality, nervous-system coherence, emotional ethics, and identity integrity.**

This is the missing layer of next-generation AI.

Investors, partners, and enterprise clients can:

- gain exclusive rights
- dominate emerging verticals
- train safer and more emotionally intelligent models
- own behavioral AI markets before they exist publicly

HHI is not just datasets.

It is **infrastructure for the next era of human-aware AI.**
